Skills & Expertise

JavaScript/TypeScript · React/Redux · HTML5 · CSS3 · Sass · Node.js · Immutable · Git/GitHub · Figma · CI/CD · UI/UX · Agile/Scrum · E2E & Unit Testing · PagerDuty · Jenkins · VSCode · Adobe ECM

Professional Experience

Web Developer | Williams Sonoma (*Contract*) — Oct 2025–Present

- **UI Development:** Partnered with creative, site merchandising, and site management teams to deliver pixel-perfect interfaces for the PotteryBarn Teen and Dormify brands.
- **Agile Delivery:** Consistently delivered features on time and ahead of schedule across weekly deployments and ad-hoc requests.

Software Engineer II | Ford Motor Company — May 2023–May 2025

- **Developer Platform:** Led cross-team collaboration with key stakeholders to build developer-facing lookup pages and enhance navigation within the Console management application, improving engineering productivity at scale using Node.js, React/Redux, and Immutable.
- **Agile Execution:** Shipped features on two-week sprint cycles in close partnership with designers, backend engineers, and technical program managers, translating Figma designs into responsive developer tools.
- **API Standards:** Championed adherence to Google's API guidelines and integrated endpoints into the JavaScript SDK, establishing consistent patterns across engineering teams.
- **CI/CD & Infrastructure:** Contributed to a company-wide migration of services from GCP to EKS in dev and staging environments, leveraging Kubernetes, ArgoCD, and Grafana.
- **Testing Modernization:** Migrated the Developer Portal test suite from Nightmare to Puppeteer, expanding end-to-end coverage and reducing long-term maintenance overhead.

Note: Autonomic was a wholly owned subsidiary of Ford Motor Company, later merged into Ford.

Software Engineer II | Autonomic — July 2019–May 2023

- **Career Progression:** Grew from intern to Software Engineer II through two promotions, earning recognition for technical excellence and eventually mentoring incoming engineering interns.
- **Frontend Development:** Built and maintained pixel-perfect UIs for new features across three internal applications using Node.js, JavaScript, and React/Redux.
- **Component Library:** Contributed to a shared component library and comprehensive unit test suite using React Testing Library.
- **Cross-Functional Collaboration:** Partnered closely with design and backend teams to deliver polished, high-quality user experiences.
